5. Recommendations

Based on collected data, the following actions are recommended:

- Temperature is above 28°C average. Review cooling systems and shading strategies.
- Humidity levels are within the recommended 30–75% range.
- CO₂ levels are within acceptable limits (< 800 ppm).
- Soil moisture sensor returned no data this period. Verify sensor connectivity.
- Water level sensor returned no data this period. Verify sensor connectivity.

DATA QUALITY NOTE 14 of 136 records were excluded (device heartbeats with no sensor readings).
